| Power | 2AA batteries (alkaline or rechargeable) Panel power adapter cord |
| Warranty | 5 years |
| Weight | 18.5 oz (524 grams) |
| Part Number | PRD000220000 |

Stratus
Heli-XT

Your headset is your connection to the world.

**Finally, helicopter pilots have a choice:
the Telex Heli-XT**

Superior Noise Protection

Telex pioneered Active Noise Reduction (ANR) technology in aviation headsets and now we've taken hearing protection a step further with noise reduction technology for the helicopter pilot. The Heli-XT cancels harmful, low-frequency noises common in helicopters that other headsets can't block.

Comfort

Telex's patented ComfortCam™ system allows you to adjust your headset for a custom fit. It alleviates clamping, no matter how long you wear the headset.

FlexPower™

Telex's unique advanced power management system gives pilots the option to power the headset via the helicopter panel, standard alkaline batteries, or rechargeable batteries. Provides 50 hours of battery life.

Reliability

Telex is the market leader in aviation headsets. We're the headset of choice for more than 70 percent of commercial pilots, who depend on us to provide clear, reliable communications. We now bring that leadership and expertise to the helicopter pilot.

ComfortCam™
technology offers
quick and easy
tension control for
clamp-free flying.

Ear cups
include foam seals
and two-directional
pivoting to conform
to the shape of the
head — even around
eyewear — and
evenly distribute
weight, minimizing
hot spots and
pressure on the ears.

Individual volume
controls for each
earcup accommodate
individual preferences.

FlexPower™
advanced power
management system
with cell phone
connector and stereo
music interface jack.
Includes built-in
recharging system.

Coiled cord
and TP-120, U-174/U
equivalent plug.
